

Tier 3 Vocabulary

Criteria	A standard by which something is judged
Investigate	To find out as much as possible
Evaluate	To decide how good something is, after thinking carefully about it
Needle	A thin pointed piece of metal with a hole for thread at one end
Thread	A strand of cotton, silk etc used for sewing
Stitch	To make loops of thread in sewing
Running Stitch	A simple needlework stitch consisting of a line of small even stitches which run back and forth through the cloth without overlapping.
Cross Stitch	A stitch formed of two stitches crossing each other
Binca	A type of fabric used to guide sewing

D&T skills

We are being designers by:

- gathering information about the needs and wants of particular individuals and groups
- developing our own design criteria and use these to inform our ideas
- generating innovative ideas, drawing on research
- producing appropriate lists of tools, equipment and materials that we need
- formulating step-by-step plans as a guide to making
- Choosing appropriate materials for creating our product.
- Using appropriate joining methods.
- Evaluating our work.

Key Facts

Research is important because:	It tells you what people like or want.
A criteria is important because:	It gives you a guide for creating your product.
The hole in a needle is called:	The eye
To join two pieces of material I will need:	A needle and thread Or fabric glue
To sew two piece of material together I should use	A running stitch
Two stitches I can use to decorate material are:	Running stitch and cross stitch
Button holes need stitching around the edges because:	They will get wider the more you use them.
